GWS Contractors, Inc.
105 Fresh Ponds Road
South Brunswick Twp
Jamesburg, NJ 08831

Dear Mr. Davis

Thank you for all of the outstanding work that your company provided us during the oil remediation process. The team assigned to my job was led by Vinny and primarily supported by Andy. They are outstanding professionals with a tremendous work ethic. I cannot begin to site the number of times neighbors provided unsolicited compliments of Vinny, Andy and GWS.

Not one single neighbor complained to me during the entire remediation process. In fact, neighbors were pleasantly surprised that your workers kept the worksite so clean; they diligently swept the street each afternoon. I have heard on more than one occasion that the crew was the hardest working contractors people have witnessed and most diligent professionals having the experience and wisdom to run the process smoothly without interruption.

We are very grateful to have had the full attention of your company. Dennis, the senior project manager, is a tremendous asset to your company. He had the knowledge to tell me which direction the floor joists ran before entering the house. Additionally, Dennis has the experience and foresight to plan out issues before they came to light.

What a better result than to have successfully completed the project ahead of schedule!

Please feel free to share this letter with prospective clients and to pass my name and number along as a reference.

Best Regards,

Michael Fallin
